Average Weighted Maturity (1)\* 29 Days

Average Weighted Life (2)\* 103 Days

Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

#### **NEW PARTICIPANTS**

We would like to welcome the following entity who joined the TexSTAR program in May:

\* Kaufman County Fresh Water Supply District No. 1-C

### HOLIDAY REMINDER

In observance of **Independence Day, TexSTAR** will **be closed on Friday, July 3, 2020.** All ACH transactions initiated on Thursday, July 2nd will settle on Monday, July 6th. Notification of any early transaction deadlines on the business day preceding this holiday will be sent by email to the primary contact on file for all TexSTAR participants. Please plan accordingly for your liquidity needs.

### ECONOMIC COMMENTARY

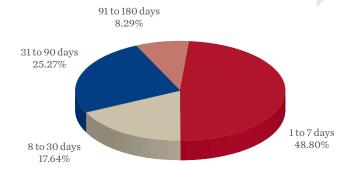

### Market review

The impact of the COVID-19 pandemic continued to dominate markets in May, with an increasing focus on how countries would begin to relax their lockdown measures and how this would affect the economy. Markets continued to normalize and credit spreads tightened given the Federal Reserve's \$3 trillion balance sheet expansion, the flattening of the COVID-19 contagion curve and optimism about growing momentum to reopen economies. However, intensifying tensions between the U.S. and China have increased geopolitical uncertainty just as concerns over the health crisis have begun to recede. The U.S. unemployment rate for April reached 14.7%, the highest level in post-war history. With around 10 million additional people claiming unemployment insurance over the last month, the unemployment rate will continue to worsen in the next jobs report on June 5th. With stay-at-home orders in the U.S. having started around the end of March and activity still not back to full capacity, the expectation is for second quarter GDP to be considerably worse than in the first quarter. Almost all states have relaxed their lockdown orders to some degree despite the fact that several states are still experiencing an acceleration in new daily infections. As U.S. states begin to increasingly relax their stay-at-home orders, we will need to monitor the infection rate. After the U.S. Federal Reserve (Fed) reacted quickly last month by increasing its balance sheet purchases, it made no meaningful adjustments to policy at its May meeting. Fed Chair Powell did push back on using negative rates as he does not believe they are good for the economy and have shown mixed evidence of success particularly given some of the downside effects on the banking sector.

### TEXSTAR VERSUS 90-DAY TREASURY BILL

This material is for information purposes only. This information does not represent an offer to buy or sell a security. The above rate information is obtained from sources that are believed to be reliable; however, its accuracy or completeness may be subject to change. The TexSTAR management fee may be waived in full or in part at the discretion of the TexSTAR co-administrators and the TexSTAR rate for the period shown reflects waiver of fees. This table represents historical investment performance/return to the customer, net of fees, and is not an indication of future performance. An investment in the security is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the issue seeks to preserve the value of an investment of \$1.00 per share, it is possible to lose money by investing in the security. Information about these and other program details are in the fund's Information Statement which should be read carefully before investing. The yield on the 90-Day Treatill Yield's is shown for comparative purposes only. When comparing the investment returns of the TexSTAR pool to the T-Bill Yield, you should know that the TexSTAR pool consists of allocations of specific diversified securities as detailed in the respective Information Statements. The T-Bill Yield is taken from Bloomberg Finance L.P. and represents the daily closing yield on the then current 90-Day T-Bill. The TexSTAR yield is calculated in accordance with regulations governing the registration of open-end management investment companies under the Investment Company Act of 1940 as promulgated from time to time by the federal Securities and Exchange Commission.

#### (continued from page 1)

Short term markets have recovered significantly and funding stress has eased. Libor rates have materially declined as risk aversion has cooled and money has flowed back into prime money market funds. The 3 Month Libor – Fed Funds spread, which is an indicator of market functionality, suggests normality is returning to the market. The spread at May month-end stands at 32 bps, which is well off the March highs of 138 bps and very near its 5 year average. Meanwhile net U.S. Treasury bill issuance has increased given the enormous aid package provided by the U.S. Government. The U.S. 3-month Treasury bill yield rose 4 bps to end the month at 0.14%, while the 12-month Treasury bill yield was unchanged at 0.17%.

#### Outlook

With the Fed moving quickly and decisively, and the U.S. government providing significant aid and support to businesses and consumers, what followed over April and early May was a commitment of fiscal support at a speed and scale never before seen in peacetime, matched by an extension of Fed intervention in asset markets unimaginable just a few weeks earlier. Two months on, much progress has been made and the current outlook differs profoundly from the views we held in late March. Countries around the world are reopening their economies, high frequency data show signs of bottoming, earnings forecasts have been cut sharply to align with the economic outlook, and policy support is widespread and comprehensive. Above all, this crisis has unfolded faster than any previous crisis, and while the economic contraction is likely to be deep, the recession may well be relatively short-lived. The disruption from COVID-19 is easing at the margin and the economic outlook is improving. The trajectory of growth is likely to be positive, coming from the currently low base level in activity. Indeed, we believe that the economy has already passed through the trough of an admittedly very steep recession. However, market participants continue to debate the slope and shape of the recovery to come. We believe that the road to recovery will be long and challenging. Inflation will remain low, and unemployment will be unacceptably high, possibly peaking at 20% before declining to somewhere in the teens by year end. This is an unfolding reality that policy makers (public and private) must accept and begin to deal with.
