#### **June Averages**

| Average Invested Balance                 | \$9,947,138,859.12 |
|--|--------------------|
| Average Monthly Yield, on a simple basis | 0.9850%            |
| Average Weighted Maturity (1)            | 42 Days            |
| Average Weighted Life (2)                | 57 Days            |

#### Definition of Weighted Average Maturity (1) & (2)

 (1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.
 (2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waved in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

### NEW PARTICIPANTS

We would like to welcome the following entity who joined the TexSTAR program in June:

Waller County Municipal Utility District No. 33

## ECONOMIC COMMENTARY

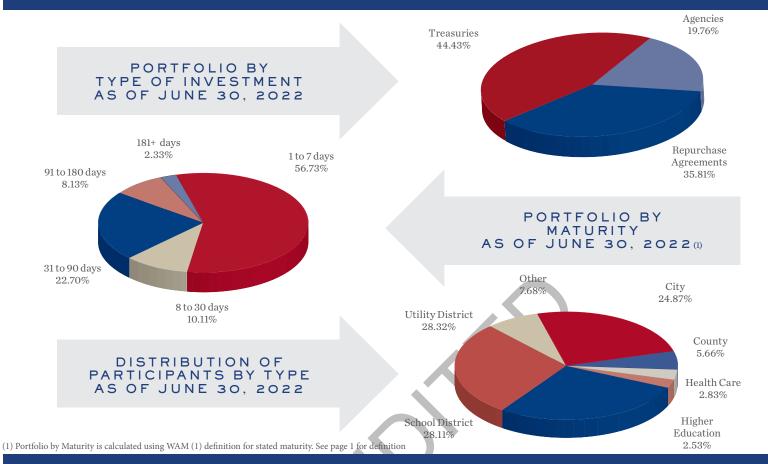

#### **Market review**

The end of the quarter brought growing fears of a recession to the market with economic data beginning to cool as the Federal Reserve (Fed) grappled with the highest inflation in 40 years. Persistent inflationary pressures caused the Fed to take aggressive action, leading to a surge in interest rates. Higher rates and Quantitative Tightening (QT) contributed to a significant tightening in financial conditions, as the dollar appreciated, mortgage rates jumped, and equity prices plummeted. Combined with falling consumer confidence and massive fiscal drag, the risk of a near-term recession increased. Higher mortgage rates led to a sixth monthly fall in the June homebuilder confidence and a -14% and -7% month-over-month (m/m) move down in May housing starts and permits. Business sentiment appeared to be eroding with a decline in the June Philadelphia Fed survey and a lower-than-expected decline in jobless claims. Lastly, higher inflation and lower confidence started to weigh on consumer spending with May retail sales -0.3% m/m (due to autos) and +0.1% ex-auto and gasoline (softest pace this year).

The May CPI report showed hotter-than-expected inflation, despite hopes for a moderation. Headline CPI rose 1.0% m/m and 8.6% year-overyear (y/y), while Core CPI jumped 0.6% m/m and 6.0% y/y. While surges in energy and food prices led to the upside in headline CPI, core inflation continued to accelerate as airfares, new vehicle prices and shelter costs rose solidly. The inflation surge doesn't appear to be cooling off just yet as higher costs for groceries, gasoline, and everyday goods and services continued to inflict pain on consumer wallets, pandemic savings, and wage gains. Supply chain woes have yet to ease. Even with a dip in sales, a chronic lack of auto inventory pushed prices higher for new and used vehicles, up 1% and 1.8%, respectively. Higher home prices continued to feed into owner's equivalent rent, with the index accelerating to 0.6% m/m, breaking out from its recent 0.4-0.5% pace.

Consumer sentiment weakened considerably with rapidly rising prices for food and energy likely playing a significant role. University of Michigan Consumer sentiment for June disappointed, at 50.2 versus 58.1 expected and 58.4 in May, plunging to its worst level in the history of the series going back to the 1970s. *(continued page 4)*

Market value of collateral supporting the Repurchase Agreements is at least 102% of the Book Value. The portfolio is managed by J.P. Morgan Chase & Co. and the assets are safekept in a separate custodial account at the Federal Reserve Bank in the name of BexSTAR. The only source of payment to the Participants are the assets of TexSTAR. There is no secondary source of payment for the pool such as insurance or guarantee. Should you require a copy of the portfolio, please contact TexSTAR Participant Services.

### TEXSTAR VERSUS 90-DAY TREASURY BILL

This material is for information purposes only. This information does not represent an offer to buy or sell a security. The above rate information is obtained from sources that are believed to be reliable; however, its accuracy or completeness may be subject to change. The TexSTAR management fee may be waived in full or in part at the discretion of the TexSTAR co-administrators and the TexSTAR rate for the period shown reflects waiver of fees. This table represents historical investment performance/return to the customer, net of fees, and is not an indication of future performance. An investment in the security is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the issuer seeks to preserve the value of an investment of \$1.00 per share, it is possible to lose money by investing in the security. Information about these and other program details are in the fund's Information Statement which should be read carefully before investing. The yield on the 90-Day Treasury Bill ("T-BIII Yield") is shown for comparative purposes on ly. When comparing the investment returns of the TexSTAR pool to the T-Bill Yield you should know that the TexSTAR pool consists of allocations of specific diversified securities as detailed in the respective. Information Statements. The T-Bill Yield is taken from Bloomberg Finance L.P. and represents the daily closing yield on the 90-Day T-Bill. The TexSTAR yield is calculated in accordance with regulations governing the registration of open-end management investment companies under the Investment Company Act of 1940 as promulgated from time to time by the federal Securities and Exchange Commission.

#### ECONOMIC COMMENTARY (cont.)

Driving the move was a large drop in the consumer views of their current personal financial situation as well as drops in current and expected business conditions. Consumer confidence as measured by the Conference Board survey also declined from 103.2 in May to 98.7 in June. Stubbornly high inflation pushed the Fed to accelerate its rate hiking schedule. After May's 40-year high inflation print and decade high University of Michigan inflation expectations, the Federal Open Market Committee (FOMC) raised rates by 75 basis points (bps) to 1.50%-1.75%. Guidance was hawkish, with the median FOMC "dot" forecast showing rates up another 175 bps by year-end to a restrictive 3.4% (and +33 bps next year to 3.8%). To bring down inflation, the Fed's economic projections showed a willingness to tolerate lower growth (1.7% 2022 & 2023) and slightly higher unemployment (4.1% 2024). These forecasts outline a "soft landing", but the Fed's willingness to overtighten has increased recessionary risks over the next year, pushing U.S. equities further into a bear market and Treasury yields higher.

Despite increasing growth concerns, strength in the labor market continued into May, with nonfarm payrolls rising by a robust 390K. The unemployment rate remained steady at 3.6% for the third consecutive month, while the labor force participation rate ticked up to 62.3% from 62.2%, and wage growth continued at its moderate pace of 0.3%. The Job Openings and Labor Turnover Survey (JOLTS) also pointed to continued strength with 11.254 million job openings reported for May, a very high reading by historical standards, although down from its peak. Similarly, the number of quits remained very high in May (4.270 million) despite cooling in both May (-1.3%) and April (-2.7%). Flexibility in labor supply is likely allowing job gains in areas most in need (construction, leisure and hospitality, and education) while shedding jobs with excess (retail). Volatility remained elevated during the month. The six-month Treasury bill yield saw the largest increase on the month, rising 92 bps to end at 2.49%, while the two-year Treasury note yield increased 87 bps at its peak mid-month of 3.43% before ending the month up 40 bps at 2.96%.

#### Outlook

This year, so far, has been a very difficult one for investors with heavy losses in both equity and fixed income markets. On the positive side, the impact of COVID-19 on the economy continues to fade. However, in its place, investors face new challenges, with Russia's brutal invasion of Ukraine and China's zero Covid policy both contributing to sustained high inflation. In response, the Federal Reserve has turned much more hawkish, raising interest rates by 0.75% in June and promising further tightening in the months ahead. In response to persistent inflation pressures, the Fed has embarked on an even more hawkish rate tightening path and the runway for an economic "soft landing" is getting narrower. High inflation and Fed tightening have, in turn, led to fast rising mortgage rates and this, in combination with fiscal drag, an over-valued dollar, record-low consumer sentiment and stock market losses, is rapidly undermining economic momentum. As we enter the second half of 2022, there is a growing danger that the U.S. economy could slip into recession. On the positive side, while real GDP shrank in the first quarter, monthly data suggests it lodged solid growth in the second as the Omicron wave subsided and spending picked up in pandemic-impacted areas such as travel, restaurants, leisure and entertainment.

However, as the third quarter begins, there are gathering forces slowing economic momentum. The most important is fiscal drag, with the federal budget deficit likely to fall from 12.4% of GDP last fiscal year to less than 4% of GDP this year, reflecting an end to stimulus checks, enhanced unemployment benefits, enhanced child tax credits and a host of other programs that were supporting the income and spending of lower and middle-income households. In addition, the housing sector is being battered by a more than 2.5% surge in 30-year mortgage rates while U.S. exports are being impeded by a more than 8% rise in the trade-weighted dollar since the start of the year. This, along with collapsing consumer confidence in the face of fast-rising food and energy prices and a slumping stock market, threatens to slow the economy in the second half of the year, with a rising risk that the U.S. economy could fall into recession. The labor market continues to be a bright spot in an otherwise gloomy environment, with the unemployment rate remaining at 3.6% in May 2022 for the third consecutive month, just 0.1% above its 50-year low set in 2019. Even with this, there is a massive excess demand for labor, with job openings still far exceeding those who are unemployed. This excess demand should fade somewhat over the next few months reflecting slowing economic momentum and diminished business confidence.

#### ECONOMIC COMMENTARY (cont.)

Inflation continues to run very hot with a May headline CPI showing an 8.6% year-over-year gain, well above market expectations. Today's high inflation largely reflects the impact of surging consumer spending, fueled by fiscal stimulus, colliding with supply shortages across major sectors of the economy. More recently, this has been amplified by a general recovery in airfares, hotel rates, and rents from their pandemic lows. The Russian invasion of Ukraine and China's attempts to maintain a "zero-COVID" policy are extending supply chain problems and year-over-year CPI inflation may not have peaked yet. By the end of 2022, we do expect some of the supply-chain issues to fade, allowing headline inflation to ease. However, the longer high inflation persists, the stickier it gets, and core consumption deflator inflation could remain above 3% year-over-year throughout 2022 and 2023. While longer term forces could cut inflation further by the middle of the decade, the potential persistence of inflation well above the Fed's 2% target over the next two years has major implications for monetary policy.
