Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate. (2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waved in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

HOLIDAY REMINDER

In observance of Good Friday, **TexSTAR will be closed Friday, March 29, 2024.** All ACH transactions initiated on Thursday, March 28th will settle on Monday, April 1st. Notification of any early transaction deadlines on the business day preceding this holiday will be sent by email to the primary contact on file for all TexSTAR participants. Please plan accordingly for your liquidity needs.

ECONOMIC COMMENTARY

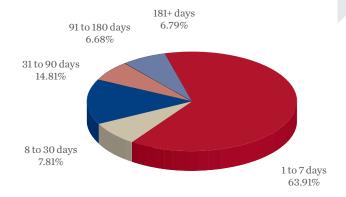

Market review

The Federal Reserve's (Fed) ability to balance price stability with maintaining economic health remained at the forefront of the macro landscape for 2024. Data in February was a mixed bag. Jobs were abundant, but inflation came in hot, and consumers took a breather from their heady pace of spending in the fourth quarter. The second estimate of 4Q23 GDP portraying an economy that expanded at an impressive 3.2% annualized rate. Overall, compared to the advanced estimate, revisions were mixed, with a decline in private inventory investment, which was partially offset by an uptick in state and local government spending as well as consumer spending. While many of the underlying details looked strong, consumption continued to power the economy. That said, consumer spending was more muted in January, with real personal spending declining 0.1% month-over-month (m/m). January retail sales also fell, declining 0.8% m/m, and December's figure was modestly revised lower. The control group, which is the input into GDP, was down 0.4% m/m. Declines were broad-based except for increases in restaurants, bars, grocery stores, and furniture. Although personal income rose, causing the savings rate to tick up slightly from a 3.7% to 3.8% annualized rate, the savings rate remains below pre-pandemic levels.

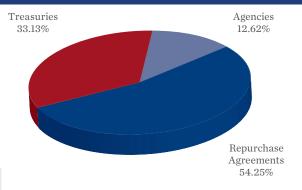

Meanwhile, January inflation data surprised to the upside, with headline CPI rising 0.3% m/m and 3.1% year-over-year (y/y) while core inflation gained 0.4% m/m and 3.9% y/y. Across core services, shelter inflation accelerated to 0.6% m/m, supported by the fastest monthly increase for owners' equivalent rent in nine months. Auto insurance and airline fares both rose 1.4% m/m, while medical care services also remained elevated. Core goods prices eased despite shipping disruptions, falling 0.3% m/m. Elsewhere, the Personal Consumption Expenditures Price Index (PCE) for January came in roughly in line with expectations, but above December's levels, rising by 0.3% m/m for the headline measure and 0.4% for the core measure. While strong, the year-over-year figures declined to 2.4% and 2.8%, respectively. The January Employment Report showed a labor market with plenty of momentum to start the year. Nonfarm payrolls rose by an impressive 353,000, almost double consensus expectations, with gains widespread across the economy. The unemployment rate held steady at 3.7% for a third straight month, marking the 26th consecutive month in which the unemployment rate was at or below 4%. (continued page 4)

INFORMATION AT A GLANCE

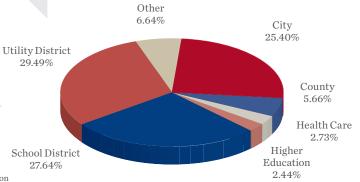

PORTFOLIO BY TYPE OF INVESTMENT AS OF FEBRUARY 29, 2024

DISTRIBUTION OF PARTICIPANTS BY TYPE AS OF FEBRUARY 29, 2024

PORTFOLIO BY MATURITY AS OF FEBRUARY 29, 2024(1)

(1) Portfolio by Maturity is calculated using WAM (1) definition for stated maturity. See page 1 for definition

ECONOMIC COMMENTARY (cont.)

Meanwhile, wage growth accelerated to 0.6% m/m and 4.5% y/y. Initial Jobless Claims also continued to underscore tight labor dynamics. At the first Federal Open Market Committee (FOMC) meeting of the year, the Fed voted to leave the federal funds rate unchanged at a target range of 5.25%-5.50%. The minutes from the meeting were released in February and generally matched the tone and comments from Chair Powell's press conference where he pushed back on a March rate cut and emphasized greater confidence was needed that inflation is moving back to the 2% target. The Committee agreed that policy is likely at its peak rate. It appears that more participants are concerned about easing too quickly versus the risk of keeping policy too tight for too long. Given the hot inflation print and tight labor market, interest rates moved higher as the market pulled back its expectations for rate cuts in 2024. While the three-month Treasury bill yield was relatively unchanged, up 1 basis point (bp), ending the month at 5.38%, the one-year T-bill and two-year Treasury yields rose more significantly by 28 bps and 41 bps to 5.00% and 4.62%, respectively.

Outlook

Healthy growth momentum, strong corporate earnings, and a resilient labor market have all added credence to a soft landing. Although there continues to be an overall disinflationary trend, January's surprisingly hot inflation reports dashed hopes for any rate cuts in March causing markets to lower their expectations for easing in 2024, more closing matching the Fed's forecast of three cuts this year. Going forward, the Fed will need to see further evidence that inflation is moving back to 2% before delivering rate cuts. Until then, it has made no conclusions on the timing of rate cuts or the end of quantitative tightening (QT). In fact, the January FOMC meeting minutes corroborated Chair Powell's message at the press conference that the Fed will take its time cutting rates. As such, monetary policy uncertainty remains. After the exceptional growth we experienced in 2023, driven by a strong job market and consumer spending, growth will likely be slower in 2024. We continue to believe that they will kick off policy easing beginning in June or July this year.
