### **Economic Commentary**

European and global growth concerns continued to be the main drivers of markets during the quarter. In the U.S., an unseasonably warm winter pulled economic activity forward into the first quarter. While the housing market appears to be stabilizing, consumers continue to de-leverage and corporations are still hoarding cash, thus holding back spending and job creation. Consistent with slowing growth in the labor market, consumer spending growth has waned. In Europe, austerity measures are taking a bite out of growth, pushing the peripheral areas into a recession and threatening to do the same to the core. Growth in Asia, and China in particular, has been below expectations, and the Bank of China has not been as aggressive in stimulating the economy as investors had hoped. Markets found some reassurance from the EU Leaders Summit where the leaders agreed to use pooled ESM funds from all EU countries that can issue bonds to directly recapitalize banks without using the sovereign as intermediary and guarantor. This announcement was the main reason markets rebounded the last day of the quarter, pointing to the extremely low expectations from investors that EU leaders would come up with any substantial agreement. In the U.S., investors hoped that the Federal Reserve would embark on a new asset purchase program, but were disappointed as the Fed announced only the continuation of its "Operation Twist" program until the end of 2012.

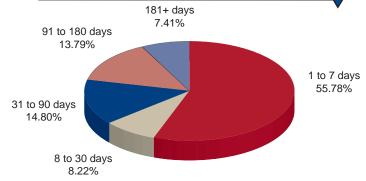

Economic outlook for growth in the U.S. is still mired with uncertainty, much of which is due to the "fiscal cliff" of automatic spending cuts via sequestration and expiring income tax cuts, payroll tax cuts and Medicare reimbursement rates for doctors. Congress will likely vote to delay the effective date of spending cuts until well into the first quarter of 2013. However, the lack of a compromise could detract from GDP by as much as 3% to 4% and trigger a recession next year. If the markets see a growing probability that no agreement can be reached, Treasury rates will fall further and risk assets, such as corporate credit, will underperform, pricing in the expectation of lower earnings. The Fed has communicated that it is ready to ease again, should economic conditions warrant. With inflation subdued and even falling, and little improvement in labor market slack, the chances of further accommodation prior to the end of the year is about even.
