Definition of Weighted Average Maturity (1) & (2)

- (1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.
- This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.
 - The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waived in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

Holiday Reminder

In observance of Good Friday, TexSTAR will be closed Friday, April 18, 2014. All ACH transactions initiated on Thursday, April 17th will settle on Monday, April 21st. Notification of any early transaction deadlines on the business day preceding this holiday will be sent by email to the primary contact on file for all TexSTAR participants. Please plan accordingly for your liquidity needs.

Economic Commentary

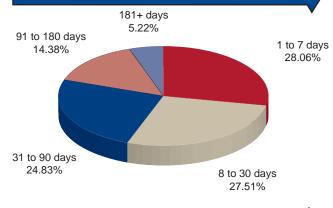

Investors entered 2014 with the expectation that equity markets would continue to rally and bonds would sell-off, yet things turned out a bit different. While developed market equities posted positive returns, these were small compared to the fourth quarter 2013. Meanwhile, bonds outperformed equities and the U.S. Treasuries also strengthened. Concerns about an uneven U.S. economy, a slowdown in the emerging markets, and turmoil in Ukraine benefited U.S. Treasuries during most of the quarter, while emerging market equities and bonds suffered. The Federal Reserve's initiation of its gradual retreat from quantitative easing led to a "liquidity squeeze" in those emerging market countries with weaker current account balances that had relied on the influx of global liquidity over the last few years and a flight to quality in U.S Treasuries. At the March FOMC meeting, the Committee reiterated that the fed funds rate will remain in the current 0 to 25bps range for a considerable time, but in the press conference, Chairwoman Yellen surprised markets when she mentioned that "considerable time" could mean "six months" after asset purchases end. In addition, the Federal Reserve participants' median projections of the fed funds rate were higher than the December 2013 meeting projections for 2015 and 2016. Investors immediate responded by selling U.S. Treasuries, especially shorter maturities.

The global economy continues to recover, but not expand, with base case scenario still being sub-trend global growth through the remainder of the year. Economic recovery in the U.S. is broadening, excluding the weather impact, while Europe appears to be stabilizing. However, this optimism is offset by a generally deteriorating trade surplus in Japan and tighter credit conditions in China. Labor market slack in the U.S. remains sufficient to keep inflation at low levels. Inflation risks are to the downside, as deflation is still a very real threat in peripheral Europe, and Japan is exporting its deflation to the U.S. Central banks will remain accommodative until deleveraging is complete or inflation is evident.

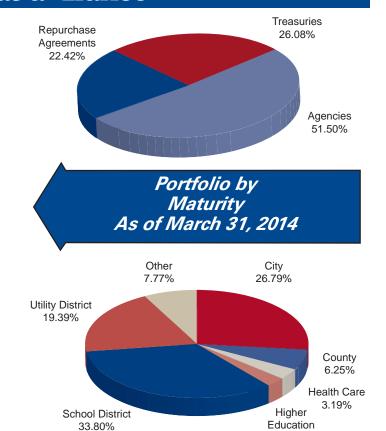

This information is an excerpt from an economic report dated March 2014 provided to TexSTAR by JP Morgan Asset Management, Inc., the investment manager of the TexSTAR pool.

TexSTAR versus 90-Day Treasury Bill

This material is for information purposes only. This information does not represent an offer to buy or sell a security. The above rate information is obtained from sources that are believed to be reliable; however, its accuracy or completeness may be subject to change. The TexSTAR management fee may be waived in full or in part at the discretion of the TexSTAR co-administrators and the TexSTAR rate for the period shown reflects waiver of fees. This table represents historical investment performance/return to the customer, net of fees, and is not an indication of future performance. An investment in the security is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the issuer seeks to preserve the value of an investment at \$1.00 per share, it is possible to lose money by investing in the security. Information about these and other program details are in the fund's Information Statement which should be read carefully before investing. The yield on the 90-Day Treasury Bill ("T-Bill Yield") is shown for comparative purposes only. When comparing the investment returns of the TexSTAR pool to the T-Bill Yield, you should know that the TexSTAR pool consist of allocations of specific diversified securities as detailed in the respective Information Statements. The T-Bill Yield is taken from Bloomberg Finance L.P. and represents the daily closing yield on the then current 90-day T-Bill.
