Definition of Weighted Average Maturity (1) & (2)

- (1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.
- (2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.
- * The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waived in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

Rates reflect historical information and are not an indication of future performance.

New Participants

We would like to welcome the following entities who joined the TexSTAR program in March:

★ City of Tool

★ Westwood Magnolia Parkway Improvement District

Holiday Reminder

In observance of Good Friday, **TexSTAR will be closed Friday, April 14, 2017.** All ACH transactions initiated on Thursday, April 13th will settle on Monday, April 17th. Notification of any early transaction deadlines on the business day preceding this holiday will be sent by email to the primary contact on file for all TexSTAR participants. Please plan accordingly for your liquidity needs.

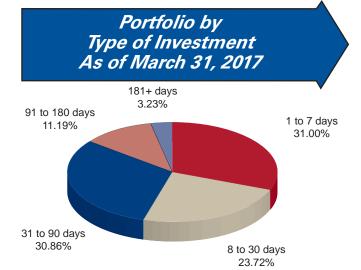

Economic Commentary

In the fall of 2016, a change in market sentiment altered expectations for the sustainability of global growth and inflation, driving U.S. interest rates higher and allowing the Fed to tighten for the first time in a year and in March, the Fed raised rates again. Sitting in the U.S., it appears that the markets are playing a waiting game and little has changed. Since the beginning of the year, the yield on the 10-year Treasury has bounced around in a fairly narrow trading range. The markets want to see the administration and Congress focus: focus on tax cuts, focus on deregulation and focus on the mechanism for getting fiscal spending into the economy. But when you broaden your perspective, you can see that a lot has changed. At the end of last year, it appeared that while the U.S. was beginning to normalize, the rest of the world was still awash in central bank accommodation, keeping rates low. What's changed is that growth is now synchronized globally. And more important, so is monetary policy. No longer does the Fed appear to be going it alone. Central banks around the world are starting to dial down that accommodation; they are leaning into growth, inflation, better credit quality and more consumption. We are beginning a transition—a transition from monetary policy to fiscal policy. Our rate view also remains unchanged from one quarter ago. At that time, we suggested that a near-term rally was possible, and we have experienced that. No path to higher rates is a straight line. We expect another three rate hikes this year and a 10-year Treasury bond that is 3% by mid-year and 3% to 3.5% by year-end. As the post-crisis recovery ages, we believe that we are still in the middle innings of the ballgame rather than near the end. We are just beginning to see the transition from years of monetary policy support and stimulus to more meaningful fiscal policy stimulus. This does not suggest we should fear an economic and/or market collapse. It will take central banks considerable time to withdraw liquidity from the system. By our estimate, it will take the Fed about a dozen years to normalize policy, including running down the size of its bloated balance sheet. And, arguably, the European Central Bank and the Bank of England have not even begun the normalization process, while the Bank of Japan seems an eternity away. A long and gradual withdrawal of liquidity will allow policymakers to be more patient in developing coherent fiscal policies. If this turns out to be the evolving policy script, then the markets will easily be able to handle a gentle rise in rates and adjust without the trauma of previous tightening cycles.

This information is an excerpt from an economic report dated March 2017 provided to TexSTAR by JP Morgan Asset Management, Inc., the investment manager of the TexSTAR pool.

TexSTAR versus 90-Day Treasury Bill

■ 90 Day T-BILL Rate ■ TexSTAR Rate

This material is for information purposes only. This information does not represent an offer to buy or sell a security. The above rate information is obtained from sources that are believed to be reliable; however, its accuracy or completeness may be subject to change. The TexSTAR management fee may be waived in full or in part at the discretion of the TexSTAR co-administrators and the TexSTAR rate for the period shown reflects waiver of fees. This table represents historical investment performance/return to the customer, net of fees, and is not an indication of future performance. An investment in the security is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the issuer seeks to preserve the value of an investment at \$1.00 per share, it is possible to lose money by investing in the security. Information about these and other program details are in the fund's Information Statement which should be read carefully before investing. The yield on the 90-Day Treasury Bill ("T-Bill Yield") is shown for comparative purposes only. When comparing the investment returns of the TexSTAR pool to the T-Bill Yield, you should know that the TexSTAR pool consist of allocations of specific diversified securities as detailed in the respective Information Statements. The T-Bill Yield is taken from Bloomberg Finance L.P. and represents the daily closing yield on the then current 90-day T-Bill.
