This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.  
(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

## PROGRAM UPDATES

### TexSTAR Board Updates

The TexSTAR Governing Board will have some new faces starting in April, as long-time Board President William Chapman and Vice President Nell Lange have announced their retirement. Bill and Nell were original Governing Board members at TexSTAR's inception in 2002 and have dedicated their time and support to TexSTAR for the past 20+ years. They have left an indelible mark on the TexSTAR program which has benefited from their leadership and commitment. We are sad to see them go but wish them the very best.

We are proud to announce that the TexSTAR Governing Board has appointed Advisory Board member Monte Mercer, Deputy Executive Director of the North Central Texas Council of Governments, as President and David Pate, Chief Financial Officer of Richardson ISD, as Vice President. In addition, the Board has appointed Anita Cothran, Chief Financial Officer of the City of Frisco, as Treasurer and Bret Starr, Finance Director with the City of Irving, to the TexSTAR Advisory Board. We also want to thank Advisory Board Member Becky Brooks, Chief Financial Officer with the City of Grand Prairie, who retires this year for her service to TexSTAR and wish her well. We are excited to welcome our new board members who are recognized leaders in Texas public finance and look forward to their leadership of the TexSTAR program.

## ECONOMIC COMMENTARY

### Market Review

The year began with a surging pandemic, a highly contested election, and vaccines in the early stages of distribution. As the quarter progressed, the prospect of a robust economic recovery and higher inflation materialized, largely because of a last-minute Democratic sweep, aggressive fiscal policy and the accelerated ramp up in vaccinations. Interest rates in the long-end rose as growing fears of an inflation scare, coupled with an ultra-accommodative Federal Reserve, fueled a reflation narrative. In March, markets remained focused on accommodative monetary policy, fiscal spending, and improving healthcare themes, which all bode well for strong economic growth. Additionally, the recent announcement of potential further stimulus via a new infrastructure package fueled the growth story even further. Following the \$1.9 trillion stimulus earlier in the quarter, the White House unveiled the ‘American Jobs Plan’, a \$2.25 trillion infrastructure plan. The 2-phase plan is largely expected to address climate change, revitalize U.S. water systems, transportation infrastructure, R&D, manufacturing, and much more. Phase 2, which will be announced later this month, could bring the overall spend to \$3-4 trillion. If the bill is passed, it will largely be subsidized by President Biden’s Made in America corporate tax plan, which will seek to increase the corporate tax rate from 21% to 28% and add a 21% tax on overseas corporate profits, undoing some tax breaks provided by the prior administration.

At its March Federal Open Market Committee (FOMC) meeting the Federal Reserve (Fed) continued to communicate its willingness to look past transitory increases in inflation, and reiterated its commitment to accommodative policy. The FOMC maintained the federal funds target rate in a range of 0.00%-0.25% and left the pace of asset purchases unchanged. In addition, the median federal funds rate projection – as measured by the “dot plot” – continues to imply no rate adjustments through 2023. In the Fed’s Summary of Economic Projections, forecasts for 4Q21 were materially upgraded with Real GDP growth estimates boosted from 4.2% to 6.5% year-over-year (y/y), growth of the PCE deflator increased to 2.4% and a reduction in the unemployment rate estimate from 5% to 4.5%. Removal of accommodation will probably come at a historically slow pace. Despite the Fed’s continued dovish tone, growing signs of a strengthening economy and rising inflation pressures have now pushed the 10 year U.S. Treasury yield up by 73 basis points (bps) from the start of the year.

In late March, the Fed announced that the temporary change to its supplementary leverage ratio (SLR), made in April last year to address the illiquidity in the U.S. Treasury market, would expire at the end of March as originally intended. The temporary change had allowed banks to exclude U.S. Treasuries and deposits held at the Fed from their SLR calculations, alleviating the need to set aside additional capital as their holdings of Treasuries and reserves expanded rapidly during 2020. Since then, the Treasury market has stabilized. The March Jobs report was much stronger than expected and suggests an even more powerful recovery than implied by the Fed’s recently upgraded projections. Non-farm payrolls rose 916,000 in March, well ahead of a consensus expectation of +658,000. Revisions added 156,000 to the job gains for January and February. With these gains, the U.S. has now recovered 14.0 million, or 62%, of the 22.4 million jobs lost in the pandemic. The unemployment rate fell to 6.0% from 6.2%, in line with consensus expectations, and the labor force rose by 347,000 in March, showing a continued decline in pandemic effects on the labor market. Inflation continued to run below the Fed’s 2% target, as the headline PCE price index rose 0.2% and the core PCE deflator rose 0.1% in February. Core PCE decelerated to 1.4% y/y (1.5% prior). Headline CPI for February rose +0.4% month-over-month (m/m) and +1.7% y/y, while core inflation came in below forecasts at +0.1% m/m and +1.2% y/y. While these prints show somewhat subdued inflation, the surge in the ISM Prices Paid Index in February, indicating pricing pressure on production inputs, and the OPEC+ decision to keep supply unchanged suggest higher inflation ahead.

### Market Review (cont.)

The US Treasury yield curve has steepened significantly over the past three months as front end yields (less than 2 years to maturity) remained well anchored by an accommodative Federal Reserve monetary policy for the foreseeable future while yields on intermediate and longer maturities increased as a consequence of the rapidly improving economic growth backdrop driven by huge fiscal stimulus, easy monetary policy and accelerating progress on the vaccine rollout. Moreover, the Treasury bill market has been trading at very low yields for a number of technical reasons, primarily due to supply and demand. U.S. money market fund demand is high as we have seen about \$100 billion in inflows since the beginning of this year, after only about \$500 billion in outflows since the ballooning of \$1.3 trillion in balances during March and April of 2020. Despite the passage of an additional \$1.9 trillion stimulus package in March, Treasury bill issuance/supply is low and is not expected to pick up until later in the second quarter as the Treasury runs down its large general account (TGA) balances. As such, the three-month Treasury bill yield declined 2 bps on the month and 4 bps on the quarter to end March at 0.02%, while the 12-month Treasury bill yield declined 1 bp and 4 bps respectively to end at 0.06%.

### Outlook

As we enter the second quarter, the economic landscape is dominated by two surges – a fiscal surge and a vaccination surge. On the fiscal front, the \$1.9 trillion American Rescue Plan should contribute to much stronger consumer and government spending in the year ahead. On the vaccination front, the U.S. has made considerable progress with an average of almost three million doses being administered each day. Inflation remains a persistent concern for investors. We expect headline inflation to be volatile in the second and third quarters, with the potential for some sticker shock as annualized base effects generate optically elevated year-on-year readings. However, we believe that many of the secular disinflationary forces – globalization, technology adoption, etc. – continue to anchor core inflations so that even allowing for huge policy stimulus, inflation rates should remain contained in 2021. The retreating pandemic coupled with new fiscal support is priming the economy for a surge over the course of 2021. Growth will be driven by pent-up demand and pent-up supply in those sectors that have been most impacted by the pandemic. We expect these to reopen very quickly, leading to high-single-digit economic growth in the second half of 2021 and going into 2022.
