

**MEETING OF THE BOARD OF DIRECTORS  
OF THE  
CENTRAL TEXAS REGIONAL MOBILITY AUTHORITY**

**RESOLUTION NO. 21-068**

**ACCEPT THE FINANCIAL STATEMENTS FOR SEPTEMBER 2021**

WHEREAS, the Central Texas Regional Mobility Authority (Mobility Authority) is empowered to procure such goods and services as it deems necessary to assist with its operations and to study and develop potential transportation projects, and is responsible to insure accurate financial records are maintained using sound and acceptable financial practices; and

WHEREAS, close scrutiny of the Mobility Authority's expenditures for goods and services, including those related to project development, as well as close scrutiny of the Mobility Authority's financial condition and records is the responsibility of the Board and its designees through procedures the Board may implement from time to time; and

WHEREAS, the Board has adopted policies and procedures intended to provide strong fiscal oversight and which authorize the Executive Director, working with the Mobility Authority's Chief Financial Officer, to review invoices, approve disbursements, and prepare and maintain accurate financial records and reports; and

WHEREAS, the Executive Director, working with the Chief Financial Officer, has reviewed and authorized the disbursements necessary for the month of September 2021, and has caused financial statements to be prepared and attached to this resolution as Exhibit A; and

NOW THEREFORE, BE IT RESOLVED, that the Board of Directors accepts the financial statements for September 2021, attached hereto as Exhibit A.

Adopted by the Board of Directors of the Central Texas Regional Mobility Authority on the 17<sup>th</sup> day of November 2021.

#### Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.  
(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waived in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

Notification of any early transaction deadlines on the day preceding or following this holiday will be sent out by email to the primary contact on file for all TexSTAR participants.

## ECONOMIC COMMENTARY

### Market review

The end of September brought new worries to the market, with rising concerns relating to uncertainty about U.S. fiscal policy, perceived Federal Reserve (Fed) hawkishness, high energy prices and the impact of tightness in global supply chains' impact on future U.S. and global growth. We saw a meaningful deceleration in the pace of economic activity during the third quarter, with consumption hit by the spread of the delta variant and higher rates of inflation. On top of all of this, the Fed released a new set of economic and interest rate forecasts as growth has disappointed and inflation has run hot. Treasury yields rose sharply out the curve with the 10-year yield ending September up almost 18 basis points (bps) at 1.49%. As we approached month-end, the political drama in Washington took front and center stage. While Congress avoided a government shutdown, the debt ceiling issue remains unresolved as does the bipartisan infrastructure bill and the Build Back Better Plan. The expiration of the two-year suspension of the U.S. debt limit (debt ceiling) occurred on July 1, 2021. Since then, the U.S. Treasury has utilized a combination of "extraordinary measures" and cash on hand to borrow normally and meet payment obligations.

## TEXSTAR VERSUS 90-DAY TREASURY BILL

This material is for information purposes only. This information does not represent an offer to buy or sell a security. The above rate information is obtained from sources that are believed to be reliable; however, its accuracy or completeness may be subject to change. The TexSTAR management fee may be waived in full or in part at the discretion of the TexSTAR co-administrators and the TexSTAR rate for the period shown reflects waiver of fees. This table represents historical investment performance/return to the customer, net of fees, and is not an indication of future performance. An investment in the security is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the issuer seeks to preserve the value of an investment of \$1.00 per share, it is possible to lose money by investing in the security. Information about these and other program details are in the fund's Information Statement which should be read carefully before investing. The yield on the 90-Day Treasury Bill ("T-Bill Yield") is shown for comparative purposes only. When comparing the investment returns of the TexSTAR pool to the T-Bill Yield, you should know that the TexSTAR pool consists of allocations of specific diversified securities as detailed in the respective Information Statements. The T-Bill Yield is taken from Bloomberg Finance L.P. and represents the daily closing yield on the then current 90-Day T-Bill. The TexSTAR yield is calculated in accordance with regulations governing the registration of open-end management investment companies under the Investment Company Act of 1940 as promulgated from time to time by the federal Securities and Exchange Commission.

## *ECONOMIC COMMENTARY (cont.)*

While the precise timing of the “x-date”, when the Treasury will exhaust its available cash and borrowing capacity, is still murky, Treasury secretary Janet Yellen stated that it could run out of cash around October 18th. The probability of a technical default (delayed payment of principal or interest) by the U.S. Treasury is extremely low, but the legislative process to raise or re-suspend the debt limit has not and will not be swift. While Senate Republicans have expressed an unwillingness to budge on the issue, Senate Democrats have the ability to pass a resolution through budget reconciliation. As such, Democrats may be able to process a debt ceiling suspension without Republican votes, but the timing will be tight. Nevertheless, having learned from past debt ceiling crises, we find it unlikely that Congress will not reach a solution in time, especially given the severity of the situation. Meanwhile, economic data was mixed. Revised 2Q21 real GDP grew at a 6.7% quarter over quarter (q/q) seasonally adjusted annual rate. Increases were broad based and were partly offset by decreases in inventories, residential fixed investment and government spending. Real output has now surpassed its previous peak in 4Q19. Recently, however, consumer spending has slowed down. After posting more than 11% annualized growth in the first two quarters of this year, consumption may have grown by as little as 2% in the third quarter, as the delta variant slowed the services rebound and a chronic shortage of inventories slammed light-vehicle sales. The September PMIs pointed to a slowing pace of economic expansion, although more concentrated in services than manufacturing. The ISM manufacturing PMI strengthened more than expected to 61.1, from 59.9 in August. Consumer confidence in September as measured by the Conference Board declined from 115.2 to 109.3 – the lowest level since March. Both present and expected conditions also declined. Hiring momentum in August slowed sharply as the delta variant curbed in-person consumer activity and businesses continued to grapple with chronic labor shortages. However, despite the slowdown in hiring, robust wage growth suggests the weakness is primarily supply-side driven, with wages spiking +0/6% month over month (m/m) and 4.3% year over year (y/y). This was further corroborated by the July JOLTS report, which showed a record 10.93M job openings.

Inflation has now well surpassed the Fed’s 2% target, as the headline PCE price index rose +0.4% m/m and +4.3% y/y in August. The core PCE deflator also rose to +0.3% m/m and +3.6% y/y, with the latter slightly above market expectations. The August CPI report showed inflation moderated across a few major categories that have been most impacted by supply shortages and pent-up consumer demand, such as used cars, airlines and hotels. Headline CPI for August rose +0.3% m/m, from 0.5% in July, and +5.3% y/y, while consumer prices excluding food and energy rose +0.1% m/m and +4.0% y/y. At its September Federal Open Market Committee (FOMC) meeting, the Fed delivered a slightly hawkish message to markets on its policy outlook, recognizing slower economic progress due to the delta variant, but also robust improvement in the labor market recovery and somewhat stickier inflation than it previously assumed. In the FOMC’s Summary of Economic Projections, growth estimates were downgraded from 7.0% to 5.9% for 2021, but increased for 2022 and 2023. The FOMC also increased its unemployment estimate to 4.8% for 2021 and PCE inflation to 4.2% for 2021 and 2.2% for 2022. Notably, the Fed signaled that tapering could “soon be warranted,” raising the likelihood of a November announcement, with the program ending in mid-2022. With regards to interest rates, the “dot plot” now implies a half-hike in 2022, three rate hikes in 2023 and another three in 2024, although two of the members that were likely in favor of hiking rates in 2022 have retired since the meeting. The higher dots were driven by higher inflation forecasts as Fed Chair Jerome Powell stated that the “substantial further progress” threshold, from an inflation perspective, has been achieved. While the labor market mandate has not yet been met, the labor market has recovered more than 75% of the jobs lost during the depths of the pandemic and Powell remained optimistic on the potential for jobs growth. Despite the volatility in the longer part of the Treasury curve, Treasury bill yields remained relatively unchanged. The three-month Treasury bill yield ended the month at 0.03%, down less than 1 bp on the month; and the 12-month Treasury bill yield ended at 0.07%, up less than 1 bp.

### **Outlook**

The road to pandemic recovery has been bumpier than expected, with the delta variant and severe supply shortages cutting into consumer and business spending. However, we expect growth to reaccelerate late this year as reopening resumes and companies try to rebuild inventories. As we move into 2022, the economy should have fully recovered from the pandemic. Then, looking forward, a shortage of workers and much less fiscal and monetary stimulus should slow economic growth to its long-term trend of roughly 2% by the end of next year.

There is little doubt that the supply-side constraints and spread of the delta variant have slowed U.S. GDP growth. The delta variant health care challenges have proven to be more material than originally hoped. We modestly lowered our 2021 forecast to 6% while forecasting a still buoyant 2022 outlook at 4.5%. This is still well in excess of the economy's long-term potential. We acknowledged that even with the infrastructure and reconciliation bills in the pipeline, U.S. fiscal policy will be materially less supportive in 2022. Consequently, the consumer must be ready to take the baton from the fiscal handoff. Our look at accumulated savings over the pandemic and current savings rates gives us confidence that the consumer is in a healthy position to do so. While supply disruptions are pushing inflation higher for longer than expected, we expect them to eventually fade. More persistent inflationary pressures are building up, with anecdotal evidence from companies suggesting cost pressures have been passed through to the consumer, thus protecting corporate margins. Labor shortages and the potential for durable wage increases present more upside risks: The Beveridge curve (job openings vs. the unemployment rate) reflects a challenging and potentially more persistent mismatch for employers looking to hire in record numbers but seemingly unable to do so. This context represents a novel challenge for the Fed in its path toward policy normalization. The Fed has already well telegraphed its intention to start tapering its large-scale asset purchases. Details are expected to be announced in November, with the taper starting in December or January. Consensus is that the Fed will reduce Treasuries by \$10 billion/month and mortgages by \$5 billion/month, resulting in a full exit from the \$120 billion/month quantitative easing program within eight months. This will be followed by a hiking cycle. The Fed is likely to begin its first rate hike in late 2022 or early 2023.
