

# 45SW TOLL FACT SHEET

## OVERVIEW

The 45SW Toll is a new roadway which connects MoPac and FM 1626, bringing relief to the rapidly-growing area of southern Travis and northern Hays counties. It includes two tolled lanes in each direction. To limit impacts to the surrounding environment, 45SW Toll was built without frontage roads. The road offers drivers an alternative to congested neighborhood streets like Machaca Road, Slaughter Lane and Brodie Lane. Access to 45SW is available from FM 1626, Bliss Spillar Road, State Loop 1 (MoPac), and SH 45 west of MoPac.

## PROJECT DESCRIPTION

In addition to two vehicle travel lanes in each direction, the 45SW Toll Road features a 10-foot wide shared use path that is compliant with the requirements of the American with Disabilities Act. The path is separated from the roadway for the entire length of the corridor, except of over the Bear Creek Bridge. The shared use path will serve as part of the future Violet Crown Trail and has a trailhead under the bridge at the intersection of 45SW Toll and MoPac.

To protect the extensive karst (cave) features in the area, 90 percent of the project is built above ground level on fill dirt and did not require excavation. Many other features were implemented to protect the environment during and after construction.
