### Economic Commentary

Global risk markets reached new record highs in April as investors largely ignored weak economic data and took solace in the continued accommodative support from central banks. The Standard & Poor's 500 Index ended up 1.8%, its sixth straight month of gains. The yield of the two-year Treasury note fell 4 bps to 0.21%, and the yield of the five-year note decreased 9 bps to 0.68%. The U.S. also experienced poorer economic data particularly in the labor market. The worsening backdrop in Europe and U.S. assured investors that the ECB and Fed would continue to keep monetary policy accommodative at their upcoming meetings in May and in the long run. Inflation remains low and appears to be decelerating. Low income growth should continue to limit inflation, and a number of FOMC participants have recently argued that a case for additional easing could be warranted if inflation levels continue to fall.

The U.S. economy appears to be experiencing a spring swoon for the fourth year in a row. Heading into the first quarter, many economists expected the slow pace of fourth quarter growth to provide positive momentum going forward. Some of this prior growth was due to transitory variables, such as a fast pace of inventory accumulation after Hurricane Sandy and an increase in energy consumption due to an unseasonably cold winter. However, other data now suggest that the slowdown may persist as future consumer consumption will likely be restricted by an already low savings rate. Additionally, the stagnant state of labor markets and the large overhang of unemployed workers make it unlikely that wage growth will be the impetus for accelerating consumption. The recent rollout of sequestration fiscal cuts is dragging on economic growth, and its effects are expected to grow in the upcoming quarters. Also, growth out of emerging markets as well as Europe appears set to disappoint in the quarters ahead. It is expected that the Fed will maintain its current pace of monthly purchases through 2013, with the potential to increase Treasury purchases if labor market conditions deteriorate significantly. Also it is anticipated that interest rates will move lower and test the lower band of the recent range in the second quarter, though technical factors may create some temporary volatility.
