

**GENERAL MEETING OF THE BOARD OF DIRECTORS
OF THE
CENTRAL TEXAS REGIONAL MOBILITY AUTHORITY**

RESOLUTION NO. 25-052

**PROHIBITING THE OPERATION OF CERTAIN MOTOR VEHICLES
ON MOBILITY AUTHORITY TOLL FACILITIES PURSUANT TO
THE HABITUAL VIOLATOR PROGRAM**

WHEREAS, Transportation Code, Chapter 372, Subchapter C, authorizes toll project entities, including the Central Texas Regional Mobility Authority (Mobility Authority), to exercise various remedies against certain motorists with unpaid toll violations; and

WHEREAS, Transportation Code §372.106 provides that a “habitual violator” is a registered owner of a vehicle who a toll project entity determines:

(1) was issued at least two written notices of nonpayment that contained:

(A) in the aggregate, 100 or more events of nonpayment within a period of one year, not including events of nonpayment for which: (i) the registered owner has provided to the toll project entity information establishing that the vehicle was subject to a lease at the time of nonpayment, as provided by applicable toll project entity law; or (ii) a defense of theft at the time of the nonpayment has been established as provided by applicable toll project entity law; and

(B) a warning that the failure to pay the amounts specified in the notices may result in the toll project entity’s exercise of habitual violator remedies; and

(2) has not paid in full the total amount due for tolls and administrative fees under those notices; and

WHEREAS, the Mobility Authority previously determined that the individuals listed in Exhibit A are habitual violators, and these determinations are now considered final in accordance with Transportation Code, Chapter 372, Subchapter C; and

WHEREAS, Transportation Code §372.109 provides that a final determination that a person is a habitual violator remains in effect until (1) the total amount due for the person’s tolls and administrative fees is paid; or (2) the toll project entity, in its sole discretion, determines that the amount has been otherwise addressed; and

WHEREAS, Transportation Code §372.110 provides that a toll project entity, by order of its governing body, may prohibit the operation of a motor vehicle on a toll project of the entity if:

(1) the registered owner of the vehicle has been finally determined to be a habitual violator; and

(2) the toll project entity has provided notice of the prohibition order to the registered owner; and

WHEREAS, the Executive Director recommends that the Board prohibit the operation of the motor vehicles listed in Exhibit A on the Mobility Authority's toll roads, including (1) 183A Toll; (2) 290 Toll; (3) 71 Toll; (4) MoPac Express Lanes; (5) 45SW Toll; and (6) 183 Toll.

NOW THEREFORE, BE IT RESOLVED that the motor vehicles listed in Exhibit A are prohibited from operation on the Mobility Authority's toll roads, effective September 24, 2025; and

BE IT FURTHER RESOLVED that the Mobility Authority shall provide notice of this resolution to the individuals listed in Exhibit A, as required by Transportation Code §372.110; and

BE IT IS FURTHER RESOLVED that the prohibition shall remain in effect for the motor vehicles listed in Exhibit A until the respective habitual violator determinations are terminated, as provided by Transportation Code §372.110.

This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.
(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waived in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

ECONOMIC COMMENTARY

Market review

July was marked by significant fiscal and trade policy developments. A key highlight was the enactment of the “One Big Beautiful Bill” Act, which introduced permanent tax cuts and boosted spending on immigration and military initiatives, expected to add \$3.4 trillion to the national debt over the next decade. While trade policy continues to dominate market discussions, inflation is beginning to reflect some tariff pass-throughs, and the labor market is experiencing a more moderate pace of job growth. In the second quarter, real GDP surged to a 3.0% seasonally adjusted annual rate, a notable rebound from the 0.5% contraction in the first quarter, amid a sharp import slowdown after Q1’s tariff-driven front-loading, resulting in average growth of 1.25% in the first half of the year. Tariffs remained a focal point as the Trump administration made several key adjustments to trade policy. Compared to the aggressive levies threatened on “Liberation Day,” the new trade measures in July were relatively softer. Notable deals included a 20% tariff on Vietnamese exports, 40% on trans-shipments, and 10% on BRICS-aligned countries. Canada and Mexico faced tariffs of 35% and 30%, respectively, while Indonesia was subject to a 19% tariff. Japan’s tariffs, including those on auto exports, were reduced to 15%, aligning with the EU’s agreed rate. India faced a 25% tariff plus penalties for Russian arms and oil purchases. Additionally, on August 1, Trump signed an executive order for reciprocal tariffs on 92 trading partners, with rates ranging from 10% to 41%, set to take effect on August 7. This move will bring the effective tariff rate to the mid to high teens, marking the highest level in nearly a century. The June CPI report indicated that early signs of tariff effects are starting to appear, though they remain limited so far.

ECONOMIC COMMENTARY (cont.)

Headline CPI increased by 0.3% month-over-month (m/m), and core CPI rose by 0.2% m/m, resulting in year-over-year (y/y) figures of 2.7% and 2.9%, respectively. Tariffs are starting to have an impact, as sectors with import dependent production, like clothing, household appliances and toys, all saw price pressure. On the other hand, softening consumer demand seems to be driving disinflation in sectors like travel and tourism. Headline and core PCE came in a bit hotter than expected, rising 2.6% and 2.8% y/y, respectively. Looking ahead, tariff impacts could intensify.

The June employment report presents a mixed view of the labor market, with both positive and cautionary signals. Non-farm payrolls exceeded expectations for the fourth consecutive month, adding 147,000 jobs, driven by a surge in state and local government hiring. Beyond government hiring, the education and healthcare sectors continued to shine, demonstrating strong growth. Despite these gains, job growth in other areas, such as manufacturing and professional business services, contracted. This indicates that while certain sectors are thriving, the overall breadth of job growth remained limited. Average hourly earnings growth slowed to 0.2% month-over-month, with the year-over-year rate decelerating to 3.7%. The unemployment rate declined slightly to 4.1%, largely due to a 130,000 reduction in the labor force. Continuing claims remained elevated compared to the beginning of the year, reflecting a low-hire, low-fire labor market. At its July meeting, the Federal Open Market Committee (FOMC) decided for the fourth consecutive time to maintain the federal funds rate target range at 4.25% – 4.50%. However, Governors Bowman and Waller dissented, advocating for a 25 basis point rate cut, marking the first instance in over 30 years where two governors have dissented. The policy statement highlighted ongoing fluctuations in net exports affecting economic data and revised the description of economic growth from “solid” to “moderated.” The Federal Reserve (Fed) also noted that economic uncertainty “remains elevated”, removing previous language suggesting that uncertainty “has diminished.”

During the press conference, Chair Powell clarified that the updated language was meant to indicate that economic uncertainty has not decreased since the last meeting, despite recent trade developments. He emphasized that the Fed’s policy decisions will continue to be guided by how close each of its mandates is to its target. Powell described the labor market as balanced, with a declining labor supply keeping the unemployment rate low despite weaker labor demand. He also noted that inflation remains above target, even when excluding tariff impacts, signaling that the Fed is not yet ready to ease policy. Treasury yields generally increased throughout the month as markets anticipated that the Fed would maintain its current policy stance for longer, given the uncertain inflationary effects of trade policy. The three-month Treasury bill yields rose by 4 basis points (bps) to 4.34%, while six-month yields increased by 3 bps to 4.28%. Additionally, one-year and two-year yields saw more significant rises, climbing 13 and 24 bps to 4.10% and 3.96%, respectively.

Outlook

So far this year, the Fed has been carefully assessing inflation under the new tariff regime and has adopted a wait-and-see approach due to the lack of clear evidence of a significant weakening in the labor market. Just two days after Chair Powell’s hawkish press conference, the July Jobs report revealed a softer-than-expected increase in nonfarm employment, with only 73,000 jobs added, and significant downward revisions of 258,000 for the previous two months. This new information indicates a sharp decline in hiring, from 168,000 in 2024 to 85,000 year-to-date, and just 35,000 over the past three months—the weakest three-month period in the current cycle. The unemployment rate edged up to 4.2%. Despite these challenges, the average workweek and hourly earnings showed positive growth, with a 0.3% increase in hours worked and wages up 3.9% year-over-year. The report highlighted a shift in job growth dynamics, with service-providing industries adding 83,000 jobs, while factory jobs declined. Despite this slowdown, the unemployment rate has not risen notably, a point Federal Reserve Chair Powell highlighted in the July FOMC meeting as a sign that the labor market might remain balanced, even if labor supply is also decreasing. In response to the July Jobs report, market expectations for rate cuts have increased, with investors increasingly anticipating a rate cut in September. The probability of two full rate cuts this year has risen significantly, reflecting a shift in sentiment. While we agree with this outlook, we remain cautious, as the Fed may choose to delay action if the upcoming August Jobs report indicates stable unemployment, and tariffs continue to exert upward pressure on inflation. The Fed will receive one more employment report and two inflation reports before its next meeting, and a stable unemployment rate may lead them to hold off on rate cuts if inflationary pressures persist.
