MEETING OF THE BOARD OF DIRECTORS OF THE CENTRAL TEXAS REGIONAL MOBILITY AUTHORITY

RESOLUTION NO. 23-041

ACCEPT THE UNAUDITED FINANCIAL STATEMENTS FOR AUGUST 2023 AND SEPTEMBER 2023

WHEREAS, the Central Texas Regional Mobility Authority (Mobility Authority) is empowered to procure such goods and services as it deems necessary to assist with its operations and to study and develop potential transportation projects, and is responsible to insure accurate financial records are maintained using sound and acceptable financial practices; and

WHEREAS, close scrutiny of the Mobility Authority's expenditures for goods and services, including those related to project development, as well as close scrutiny of the Mobility Authority's financial condition and records is the responsibility of the Board and its designees through procedures the Board may implement from time to time; and

WHEREAS, the Board has adopted policies and procedures intended to provide strong fiscal oversight and which authorize the Executive Director, working with the Mobility Authority's Chief Financial Officer, to review invoices, approve disbursements, and prepare and maintain accurate financial records and reports; and

WHEREAS, the Executive Director, working with the Chief Financial Officer, has reviewed and authorized the disbursements necessary for the month of August 2023 and has caused financial statements to be prepared and attached to this resolution as Exhibit A; and

WHEREAS, the Executive Director, working with the Chief Financial Officer, has reviewed and authorized the disbursements necessary for the month of September 2023 and has caused financial statements to be prepared and attached to this resolution as Exhibit B.

NOW THEREFORE, BE IT RESOLVED, that the Board of Directors accepts the unaudited financial statements for August 2023 and unaudited financial statements for September 2023, attached hereto as Exhibit A and Exhibit B, respectively.

Adopted by the Board of Directors of the Central Texas Regional Mobility Authority on the 25th day of October 2023.

Submitted and reviewed by:

James M. Bass

Executive Director

Approved:

Robert W. Jenkins, Jr.

Chairman, Board of Directors

Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be $deemed\ to\ have\ a\ maturity\ equal\ to\ the\ period\ remaining\ until\ the\ next\ readjustment\ of\ the\ interest\ rate.$ (2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waved in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

NEW PARTICIPANTS

We would like to welcome the following entities who joined the TexSTAR program in August:

* Crandall Economic Development Corporation * City of Poteet

HOLIDAY REMINDER

In observance of Columbus Day, TexSTAR will be closed on Monday, October 9, 2023. All ACH transactions initiated on Friday, October 6th will settle on Tuesday, October 10th. Standard transaction deadlines will be observed on Friday, October 6th. Please plan accordingly for your liquidity needs.

ECONOMIC COMMENTARY

Market review

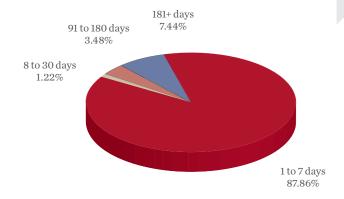

For the last year and half, the Federal Reserve (Fed) has engaged in an aggressive campaign to slow the economy in order to reduce inflation to its 2% target. However, the data have left Fed officials confused, with growth proving resilient even as inflation continues to decelerate. Recession risks and probability of recession have moderated in the near term, as employment and spending data have held up well; and corporate earnings have been resilient. However, in August, despite mixed data, we saw some signs of moderation, as unemployment inched higher and consumer confidence weakened.

Earlier this year, markets largely anticipated that economic activity, specifically capital spending, would slow due to the lagged impact of restrictive monetary policy. Instead, record low unemployment, robust business investment, and resilient American consumers have kept the economy on an above trend growth trajectory thus far in 2023. July retail sales handily beat expectations, gaining 0.7% month-over-month (m/m) and 1.0% ex-autos. While a 1.9% m/m increase in online sales contributed the most, gains were broad-based. Elsewhere, industrial production jumped by a stronger-than-expected 1.0% m/m due to elevated auto production and sweltering temperatures driving up the demand for cooling. Manufacturing output also rose 0.5% m/m. However, excluding the sharp increase in motor vehicles and parts production, gains were a more modest 0.1%. Finally, the housing market showed continued signs of stabilization. Housing starts and permits rose by 3.9% and 0.1%, respectively, as gains in single-family more than offset declines in multi-family across both measures.

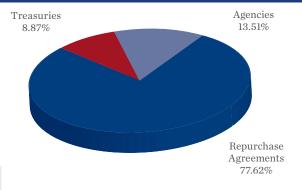

Inflation continued to come down, both at the headline and core level. The July CPI report pointed toward a continued moderation in inflation. Headline CPI rose 0.2% month-over-month (m/m) seasonally adjusted and 3.2% year-over-year (y/y) non-seasonally adjusted, a slight tick up compared to last month. (continued page 4)

ECONOMIC COMMENTARY (cont.)

Core CPI maintained its 0.2% m/m pace but eased to 4.7% on a y/y basis. In the details, lower auto prices drove core goods lower while rising shelter costs, although showing signs of moderating, contributed to an increase in core services. Similarly, headline and core PCE both rose by 0.2% m/m. Overall, the disinflationary trend remained intact.

Developments in the labor market, on the other hand, were less clear. Whereas some data components reflected a potential slowing, the bigger picture suggests that employment remains stubbornly resilient.

The August Jobs report provided further evidence that the labor market is softening. Nonfarm payrolls rose by a stronger than expected 187K. However, revisions cut 110K jobs for the last two months, suggesting a slowdown in hiring. A large increase in the labor force pushed the unemployment rate higher to 3.8%, while wage growth came in below expectations, gaining 0.2% m/m and 4.3% y/y. The Job Openings and Labor Turnover Survey (JOLTS) data for July suggested a cooling in the labor market, with job openings falling 3.7% to 8.827 million, the lowest level since March 2021, but still above pre-pandemic levels. This brought down the ratio of job openings per unemployed worker to 1.5 from the peak of 2 in March 2022. Quits also fell by 6.7%, approaching 2019 levels, while layoffs ticked up. Overall, these reports still show decent momentum in the labor market. That said, a more balanced labor market and easing wage pressures should allow core inflation to move lower, reducing the need for the Fed to hike further.

After two months of solid gains, consumer confidence tumbled in August as the Conference Board Confidence Index fell 7.9 points to 106.1. Meanwhile, GDP for the second quarter was revised lower from 2.4% to 2.1% primarily due to downward revisions to inventories and net exports, while consumption increased at a modest 1.7%. Personal spending ran hot at 0.8% in July, despite personal income slowing to 0.2% in July, down from 0.3% in June.

At the Fed's Jackson Hole Economic Policy Symposium, Chair Powell's speech was relatively balanced. He noted that "inflation remains too high" and said that the Fed is "prepared to raise rates further if appropriate" but "will proceed carefully" if they do, reaffirming the 2% inflation target. Powell noted that his concern that the economy may not be cooling as expected.

Front-end Treasury yields were relatively rangebound as markets have priced in the expectation that the Fed has now reached the end of the rate hiking cycle. Three-month and six-month Treasury bill yields rose by 4 bps to 5.45% and 5.51%, respectively, while 12-month T-bill yields were unchanged at 5.39%. Longer-term Treasury yields rose more significantly, however, given increased expectations for U.S. Treasury supply and as strong economic data caused markets to price in higher yields for longer, which pushed out expectations for rate cuts.

Outlook

Until recently, U.S. economic data has been reaccelerating with upward revisions to full year GDP forecasts and the removal of most recession expectations. The U.S. consumer remains a key pillar of economic resilience and one of the primary reasons why it has become easier to contemplate a scenario in which the U.S. avoids a recession.

American consumption, which accounts for approximately 68% of GDP, has remained stalwart, despite a restrictive monetary environment, bolstering the overall health of the economy in 2023. Real consumption rose 0.6% m/m in July, suggesting consumption is off to a solid start in 3Q. However, excess savings is on track to be depleted by year-end as pandemic stimulus dissipates; so, maintaining the same standard of living is becoming increasingly difficult for the average American. While upper income consumers may continue to show resiliency, those in the lower income category may find themselves more stretched given the high cost of capital, especially with the upcoming resumption of student loan payments.

In a seemingly endless battle to reinstate price stability, the Fed continues to search for confirmation that policy is sufficiently restrictive and that job growth is declining. The key question is whether core inflation can make further progress towards 2% without significantly dampening the labor market and overall economic growth.

(continued page 5)

ECONOMIC COMMENTARY (cont.)

Core CPI increased 0.16% in each of the past two months, bringing the 3-month moving average down to 0.25% from 0.34% in the previous month. Nevertheless, two months does not make a trend.

Meanwhile, the employment report paints a picture of a job market heading in the right direction. Although year-over-year wages may be above the Fed's 3.5% target, which Chair Powell has said is consistent with 2% inflation, and the unemployment rate is still below the Fed's 4.1% year-end forecast, the labor market trajectory is still one of deceleration.

At this point, a September hike seems like a longshot. If inflation continues its downward path, the Fed will likely need to see a strong re-acceleration in the jobs data from here to hike in November. While we recognize that the Fed's decisions will be data dependent, we continue to believe that it is likely that the Fed will not hike again this year. As of the date of this writing, the market is assigning a 7% chance of a hike in September and a 35% chance of a hike in November. Additionally, the Fed would need to see employment materially deteriorate to implement rate cuts, which is unlikely to start before mid-2024. We believe that the U.S. economy will likely not enter a recession in 2023; however, recession risks remain for the middle of 2024.

Average Monthly Yield, on a simple basis 5.3105%
Average Weighted Maturity (1) 29 Days

Average Weighted Life (2) 56 Days

Definition of Weighted Average Maturity (1) & (2)

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate. (2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

The maximum management fee authorized for the TexSTAR Cash Reserve Fund is 12 basis points. This fee may be waved in full or in part in the discretion of the TexSTAR co-administrators at any time as provided for in the TexSTAR Information Statement.

NEW PARTICIPANTS

We would like to welcome the following entities who joined the TexSTAR program in September:

- * City of Blue Mound * Galveston County Municipal Utility District No. 79 * Jacksboro Independent School District
 - * Montgomery County Municipal Utility District No. 211 * Pantego Economic Development Corporation

HOLIDAY REMINDER

In observance of **Columbus Day, TexSTAR will be closed on Monday, October 9, 2023.** All ACH transactions initiated on Friday, October 6th will settle on Tuesday, October 10th. Standard transaction deadlines will be observed on Friday, October 6th. Please plan accordingly for your liquidity needs.

ECONOMIC COMMENTARY

Market review

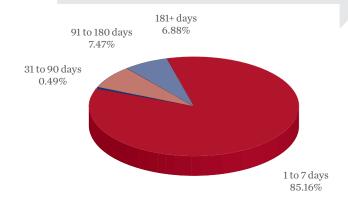

In the third quarter, easing inflation and stronger economic growth helped fuel optimism for a soft landing of the U.S. economy. However, monthly data suggest economic momentum is slowing, and we may not be out of the woods just yet. The quarter was less exciting for financial markets, which struggled as investors re-positioned for higher rates for longer. In fact, one of the few asset classes that saw positive gains short term fixed income portfolios and funds.

After nearly two years of hot inflation, a sustained inflation downtrend is now underway. The August CPI report showed continued progress on core inflation while energy contributed to a bounce in headline inflation. Headline CPI rose 0.6% month-over-month (m/m) seasonally adjusted and 3.7% year-over-year (y/y) non-seasonally adjusted, an acceleration compared to last month. This increase was largely anticipated and primarily driven by a 5.6% surge in energy prices, as consumer prices rose a more modest 0.3% excluding energy. Core CPI rose 0.3% m/m and eased to 4.3% on a y/y basis. In the details, shelter inflation continued to moderate while transportation services saw strong gains. However, moderating new and used vehicle prices in the months ahead should help ease core inflationary pressures. Similarly, headline PCE inflation accelerated to 3.5% y/y while core PCE eased to 3.9%. Moving forward, we expect that the impact of oil price spikes will be limited.

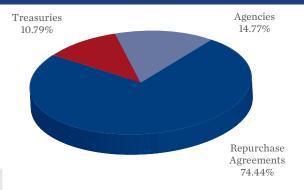

Labor market strength is gradually easing. The pace of job gains, while still robust, has been trending lower since last year. Improved labor force participation has so far supported job growth, with the participation rate for adults aged 25-54 having fully recovered to pre-pandemic levels. Wage inflation remains sticky but has been moderating. Wage growth has now come down to 4.3% y/y in August from a peak of 5.9% in March 2022. Weekly initial jobless claims for unemployment averaged 232K in the third quarter. (continued page 4)

ECONOMIC COMMENTARY (cont.)

While this is above its average of 214K in 2022, the levels are still indicative of a healthy labor market and have been trending lower more recently. The Job Openings and Labor Turnover Survey (JOLTS) data for August surprised to the upside as job openings surged 7.7% to 9.6 million, up from 8.8 million in the month prior, while quits rose a modest 0.5%. The ratio of vacancies to unemployed workers remained unchanged from July at 1.5. Job openings have been volatile around a declining trend, but the data remain well above prepandemic norms.

Given the strength in the labor market is not surprising that the consumer has been the primary driver of the economy so far, but consumer confidence has begun to falter. The Conference Board Consumer Confidence Index fell for the second straight month, from 106.1 in August to 103 in September, reflecting a decline in consumers' assessment of future business conditions. Personal spending in August showed a deceleration relative to July, at a 0.4% m/m change, down from 0.8%. The GDP revisions had limited impact on the headline growth profile, as second quarter GDP was unchanged at a 2.1% annualized rate. In the details of the revision, the composition shifted from consumption to business investment: consumption grew a modest 0.8% annualized rate while business fixed investment spending grew 5.2%, its best pace since 1Q22. Comprehensive GDP revisions painted a picture of private sector resilience and improved household savings with softer consumption growth than previously reported.

In a widely anticipated move, the Federal Open Market Committee (FOMC) voted to leave the federal funds rate unchanged at a range of 5.25% to 5.50% at its September meeting and reiterated its commitment to a data-driven approach. The updated "dot plot" remained hawkish, with the median FOMC member now expecting only two cuts in 2024, reinforcing the "higher for longer" message. Notably, its updated economic forecasts leaned strongly into the soft-landing narrative. In the Summary of Economic Projections, real GDP growth expectations rose meaningfully for 2023 and 2024. Elsewhere, the median forecast for the unemployment rate fell to 3.8% while the core PCE forecast ticked lower.

September was a challenging month for markets and for Congress. As the month ended, in a surprise turnaround just 3 hours before the deadline, Congress averted a government shutdown, passing a short-term continuing resolution to keep the government running through November 17th. Improved prospects for growth and incoming supply, against the backdrop of 'higher for longer' policy rates pushed longer term yields to their highest levels since 2007, with two-year and 10-year Treasury yields up 18 bps and 47 bps on the month to 5.05% and 4.57% respectively. Meanwhile three-month Treasury bill yields remained unchanged at 5.45%, and six-month T-bill yields increased a modest 4 bps to 5.55%. Moreover, the potential government shutdown (which was averted in the 11th hour), United Auto Workers (UAW) labor strikes and higher oil prices have weighed on investor sentiment.

Outlook

"Resiliency" has been the buzzword of 2023, with better-than-expected economic growth and corporate profits coupled with milder drags from credit tightening and business spending contraction raising hopes for a soft landing. Economic data has underscored the strength of U.S. consumers and labor markets, aided by falling inflation.

Nevertheless, the clouds of recession have not departed, as growing drags from higher energy prices, declining pandemic excess savings and the lagged effects of monetary policy suggest it is far too soon to call an "all clear" on a U.S. recession.

Business spending has held up more strongly than expected due to higher spending on manufacturing and slowing corporate profits could still constrain growth in capital expenditures. Consumers have remained resilient in the third quarter, supported by solid job growth and rising real wages. So far in 2023, excess consumer savings and the use of credit have kept consumption as a pillar of strength in the U.S. economy.

However, consumer savings balances have shrunk as they take on more debt to maintain current spending, and delinquencies are starting to rise. By our measures, pandemic excess savings has declined to \$1.1 trillion from its peak of \$2.3 trillion, leading consumers to draw on revolving credit to finance their spending habits.

(continued page 5)

ECONOMIC COMMENTARY (cont.)

Revolving credit as a share of disposable income doesn't look too worrying yet (at 6.3% in June compared to 6.5% pre-pandemic), but delinquencies for credit cards and auto loans are starting to rise. This, along with the lagged impacts of monetary tightening, higher energy prices, and the forthcoming resumption of student loan payments, should weigh on consumer spending in the coming months.

Other risks to growth are accumulating as we enter the fall. While a U.S. government shutdown was averted, Congress merely kicked the can down the road until November. The odds of a government shutdown later this year have arguably risen but would probably be temporary if it happens (a few weeks at most) until political and market pressures force everyone to keep the government open. Historically, the economic impact has tended to be short-lived and reversed the following period. Additionally, the United Auto Workers (UAW) strike continues to escalate, as progress between the UAW and automakers has not improved yet. Should it build further, the strike could negatively impact economic activity and pressure inflation upward.

Overall, the U.S. economy should continue to grow at a moderate but slowing pace from here, and while a near-term recession is not guaranteed, a slower-moving economy will be increasingly sensitive to shocks. With risks remaining on the horizon, we see at least a 50/50 chance of a recession starting by the end of 2024, and a greater chance of a recession in 2025 if one fails to materialize earlier.
