## Moving Central Texas Forward This Fall

As we move into fall, cooler weather and community events are bringing more activity to our region's roads. At the Mobility Authority, we're continuing our mission to provide Central Texans with safe, reliable connections that keep pace with our growing region.

Halloween is just around the corner, and whether you're behind the wheel or walking through neighborhoods, safety should be a top priority.

### Driver Safety Tips

- **Slow down.** Expect more pedestrian traffic and drive below the speed limit in neighborhoods. Be especially cautious when entering or exiting driveways.

- **Reduce Distractions.** That text, call, or candy bar can wait. Keep your eyes on the road. Just one glance down can lead to tragedy.
- **Use your headlights.** Turn on your headlights in the evening, even if it's not completely dark. Increased visibility helps keep trick-or-treaters safe.

### Pedestrian Safety Tips

- **Increase visibility.** Try to trick-or-treat before dark, carry a flashlight, or add reflective tape to costumes and treat bags.
- **Follow the rules of the road.** Use sidewalks and crosswalks whenever they are available. If there are none, walk facing traffic, as far from moving vehicles as possible, and wait for a gap in traffic that allows plenty of time to cross safely.
- **Obey signs and signals.** Pay attention to “Walk” and “Don’t Walk” signs and lights and continue to cross as quickly as possible if the sign changes when you are already crossing the street.

There are plenty of spooky sights this month—let’s make sure crashes aren’t one of them. Together, we can make this Halloween a safe and memorable one.

## Our Commitment to Regional Connectivity

Last month, Mobility Authority staff had the opportunity to sponsor and attend two regional events: the Austin-San Antonio Growth Summit, hosted by the Austin Business Journal and San Antonio Business Journal, and the Bastrop County Growth Summit.

These summits brought together business leaders, elected officials, and community members to discuss sustainable growth across Central Texas. Conversations focused on economic development, infrastructure investment, and the importance of reliable mobility options to support the region’s rapid expansion.

Our participation is one of the many ways the Mobility Authority helps the future of mobility by viewing transportation through a regional lens. We remain committed to identifying local needs and developing solutions that improve inter-regional connectivity.

We're also proud to share that the Mobility Authority received IBTTA's 2025 Toll Excellence Award in the Toll Operations, Engineering, and Maintenance category. This recognition honors how our teams combine technology, communication, legislation, and collaboration to improve compliance and maintain system integrity.

## Optionality is Vitality

At the Mobility Authority, we believe in the power of options. Every road we build gives drivers more choices to get where they need to go, how and when they want to go.

That same spirit of flexibility applies to how you pay for tolls. We offer both in-state and out-of-state electronic tags that save drivers 33% on tolls.

## Looking Ahead

As the year winds down, the Mobility Authority remains focused on connecting people, communities, and opportunities across Central Texas. From improving safety and reliability to

exploring new ways to serve drivers and pedestrians, we remain committed to keeping Central Texas moving forward.
